

OPTIMUM

Optimum

“The first international payment app for crypto and NFTs”

What is Optimum?

Optimum is a XRPL based **payment system** targeting foreign capital usage in Japan, at a B2C and peer to peer level. We also allow NFT mintings using XLS-20;

Integrated NFT viewer is used for:

1. Pure Collectibles
2. Loyalty Stamps
3. Promotional Redemption
4. Proof of Visit

We're tapping into a \$2.1T market

Total global tourism expenditure - calculated in USD

Category	2025 Projected Value (USD)
Total travel & tourism GDP impact	\$11.7 trillion <small>wttc +1</small>
Leisure tourism expenditure	~\$6.0 trillion (estimated) <small>tourismanalytics +1</small>
International visitor spending	\$2.1 trillion <small>globetrender +2</small>

Our investment thesis

\$2.1T global market

Projected total tourism expenditure in 2025.

\$21B in 5 years

1% market share using 2025 values

Robust Product

Easy to use Android and IOS apps

Strong Macro Backdrop

Blockchain transactions average growth at 25~30% YOY

83% YOY growth for stablecoin transactions

It's too expensive and slow

Consumers

Pay high fees and wait hours for funds to become available

- > Makes overseas spending a mental burden
- > Limited access to immediate funds / 'pending' transactions
- > ~ 3.5% fee for Mastercard or Visa

Businesses

Limited by currency and intermediaries. Reliant on paper coupons and stamps

- > Businesses can only accept local fiat - that may erode in value faster
- > Lower efficiency due to outdated methods
- > Delayed settlement times

We've chosen XRPL

- > 3~5 seconds settlement time
- > Near **zero** fees
- > Regulatory compliant
- > **Native** NFTs and tokenization
- > **XRP** and RLUSD

The world of NFTs

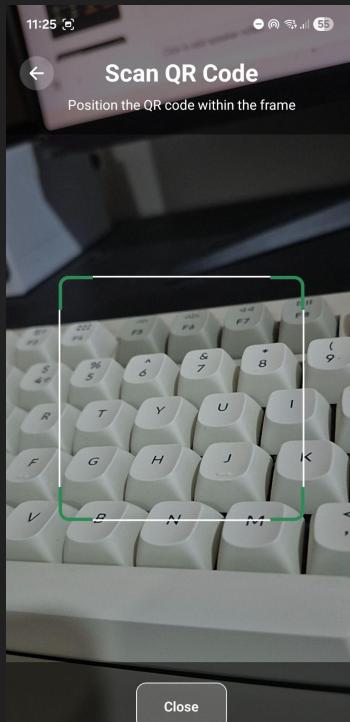

We view NFTs as pure digital **ownership**. Whether it induces nostalgia like a passport stamp, used as digital coupons or as digitized landmarks,

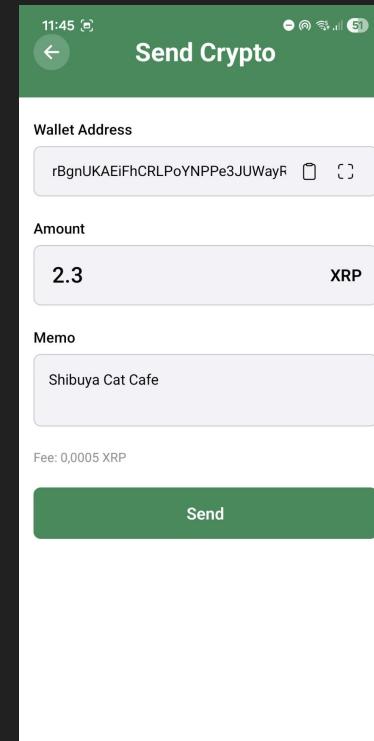

they all sit right in your personal mobiles. In the Optimum app.

By 2030...

If we capture **1%** of tourism spending $\approx \$21B$

Transaction revenue = \$105M

SaaS revenue = \$6.3M

NFT revenue = \$12.6M

Total $\approx \$123.9M$ / Year

Conservative

0.1% $\approx \$2.1B$

TR = \$10.5M

SaaS = \$0.63M

NFT = \$1.26M

$\approx \$12.4M$

Bullish

1.5% $\approx \$31.5B$

TR = \$157.5M

SaaS = \$9.45M

NFT = \$18.9M

$\approx \$185M$
